

HTY70, TY70, HY70

Room Temperature/Humidity Sensors

The HTY70 is a room temperature/humidity sensor that uses a Pt100 resistance thermometer sensor (JIS C1604 Class A) as a temperature-sensing element and a polymer capacitive humidity sensor (FP3™, specially developed by Yamatake Corporation) as a humidity-sensing element, enhancing accuracy and reliability of temperature/humidity sensing. It is suitable for commercial buildings and various other uses. The TY70 temperature-only sensor and the HY70 humidity-only sensor are also available.
